Carat Weight	1.34
Color	Fancy Vivid Yellow
Clarity	VS1
Shape	Radiant Cut
Payment	L/C, T/T, PAYPAL

Lab grown diamond is used by natural diamond crystals to imitate its growth environment, so besides the growth environment different (such as pearl farming), its physical, chemical elements, Moh's scale of hardness and refractive radius are exactly the same as natural diamonds, naked eye can not distinguish, it also can pass the test of professional diamond test pen. You can understand that lab grown diamond belongs to 100% pure carbon diamond. Moreover, lab grown diamond is more economically affordable than natural diamond, a lab grown diamond only cost 20% ~ 30% of the price of natural diamond. Lab grown diamond is more environmental protective than ture diamond as well, it only takes a lab and maybe a couple of weeks, a cultivated diamond comes out.
